

Hoosier Burger

Prepared by: Gobinda

Project Scope Statement

Date: June 15, 2021

General Project Information

Project Name: Hoosier Burger's Restaurant Management System.

Sponsor : Bob & Thelma Mellankamp.

Project Manager: Gobinda pd. Tamakatel.

Problem & Opportunity Statement

Customer's orders & demands has increased that has created problem for staff, stock-out problems & impacted sales. Customers are facing problems on ordering & there's stock out problem creating difficulties on food preparation as well. An Overall managing information system must be developed in order to handle & manage all these problems.

Project Objectives:

To manage customer's order & demand properly in time, to manage & control the inventory in a systematic way, To provide the best service to the customer with quick response. This will also help to increase the growth rate of Hoosier Burger Restaurant.

Project Description:

A new information system will be developed that will help to manage the inventory & control stocks, will be easy to deal with customer through this system, payment will be safer. It will reduce stock-out problem & increase the speed of food ordering & servicing.
